

AUSHIKAR GANESH

Cloud Operations Engineer | AWS Certified Solutions Architect

+91 9948-32-5878 · aushikarganesh2002@gmail.com · [linkedin.com/in/aushikar-ganesh](https://www.linkedin.com/in/aushikar-ganesh) · github.com/Aushikar-Ganesh

PROFESSIONAL SUMMARY

AWS Certified Solutions Architect with hands-on production experience in cloud operations, Linux server administration, and AWS infrastructure management. Skilled in monitoring production environments using CloudWatch, performing automated Linux patching via AWS SSM, and independently building automation tools using Power Automate and Microsoft Graph API. Developed personal projects covering Lambda, Kubernetes, Terraform, and CI/CD pipelines. Holds CCNA-level networking knowledge and strong fundamentals in multi-cloud environments. Eager to grow into a DevOps/Cloud Engineer role.

PROFESSIONAL EXPERIENCE

Cloud Operations Analyst (Programmer Analyst)

Dec 2023 – Present

Cognizant Technology Solutions — Bengaluru, India

- **Monthly Linux Patching via AWS SSM:** Planned and executed end-to-end month-end patching cycles for **50–60 Linux (RHEL/Ubuntu) EC2 instances** using AWS Systems Manager (SSM) Patch Manager, achieving **100% patch compliance** each cycle with zero unplanned downtime.
- **Production Environment Monitoring:** Monitored CPU utilisation, memory, and disk storage metrics across production servers using **AWS CloudWatch dashboards and alerts**. Identified and resolved disk space issues proactively by coordinating with the Windows and Linux server teams.
- **Intune Health Check Automation (Power Automate + Graph API):** Independently designed and deployed a daily automated health check report for the client using **Microsoft Power Automate, Microsoft Graph API, and Azure App Registration**. The solution queries Microsoft Intune daily across a fleet of **1,000+ managed devices**, segregated by device type (PC, Laptop, Windows), and delivers a formatted compliance dashboard via email — reporting compliant vs. non-compliant device counts and live **connector status (VPP, Autopilot, DEP, Certificate connectors)**. Eliminated the need for manual daily checks.
- **Incident Communication & Coordination:** Raised and tracked server health tickets; collaborated cross-functionally with Windows and application teams to clear storage and restore performance on production systems.
- **AWS Infrastructure Exposure:** Worked with EC2, S3, IAM, VPC, Security Groups, and Route53 in a production support capacity. Gained hands-on familiarity with ALB, ASG, RDS, and Redis as part of the broader cloud operations team.
- **SLO Awareness:** Collaborated with developers and senior engineers to understand service-level objectives and standard release practices in a large enterprise cloud environment.

CIS Multi-Cloud Intern (Programmer Analyst Trainee)

Sep 2023 – Dec 2023

Cognizant Technology Solutions — Hyderabad, India

- Configured cloud networking and firewall rules across multi-cloud infrastructure (AWS, GCP, Azure) as part of the Cloud Infrastructure Services team.
- Refreshed and applied **CCNA networking fundamentals** — including VLANs, routing protocols, and TCP/IP — in cloud network configuration tasks.
- Gained practical exposure to VMware, Hyper-V virtualisation, Linux server administration, and multi-database environments.

PERSONAL PROJECTS

Self-initiated projects built to develop hands-on skills beyond day-to-day work responsibilities.

Serverless OTP Verification System — AWS Lambda · API Gateway · DynamoDB · SNS · S3 · JavaScript

- Designed and deployed a real-time OTP authentication system on AWS using a fully serverless architecture — achieving sub-second OTP delivery and zero downtime.
- Estimated **~80% cost saving** vs. a traditional server-based approach by leveraging Lambda, DynamoDB, and SNS.
- REST endpoints exposed via API Gateway; static assets hosted on S3.

[GitHub](#) ↗

Dockerized CI/CD Deployment on AWS — Docker · GitHub Actions · Nginx · AWS EC2 · IAM · Bash

- Containerised a web application into an ultra-lightweight **5 MB Docker image** using multi-stage builds to minimise deployment footprint.
- Automated CI/CD pipeline with GitHub Actions: builds, tests, and deploys containers on every Git push to an EC2 instance behind Nginx reverse proxy.

- Configured AWS IAM role-based access and automated server setup via Bash; used self-hosted GitHub runners on EC2 to reduce pipeline costs. [GitHub ↗](#)

Cloud-Native Monitoring Application on AWS EKS — *AWS EKS · ECR · Python · Boto3 · Docker*

- Deployed a containerised monitoring app on AWS EKS; automated cluster and deployment provisioning using a **Python/Boto3 script**, reducing manual deploy time by an estimated **~40%**.
- Configured Kubernetes LoadBalancer service and Horizontal Pod Autoscaler for high availability under variable load. [GitHub ↗](#)

3-Tier Web Application on AWS (Terraform) — *AWS EC2 · RDS · ALB · Terraform*

- Designed and provisioned a production-grade 3-tier architecture (web, app, database) on AWS using Terraform IaC, achieving **99.5% simulated uptime** in testing.
- Automated all infrastructure — EC2 instances, RDS database, Application Load Balancer, and security groups — via reusable Terraform modules. [GitHub ↗](#)

TECHNICAL SKILLS

Cloud forms	Plat- AWS (EC2, S3, IAM, VPC, Route53, CloudWatch, SSM, RDS, Lambda, API Gateway, SNS, DynamoDB, ALB, ASG) Azure (App Registration, Intune, Graph API, Power Automate) GCP
Automation & IaC	Power Automate (production) Microsoft Graph API (production) AWS SSM Patch Manager (production) Terraform (projects) Docker Kubernetes/EKS (projects)
CI/CD	GitHub Actions (projects) Jenkins (foundational) GitLab CI (foundational) AWS CodePipeline (foundational)
Monitoring	AWS CloudWatch (production) Prometheus Grafana ELK Stack
Scripting	Bash Python / Boto3 (projects)
Networking	CCNA R&S (Cisco certified — 2019) VLANs, Routing Protocols, TCP/IP, Firewalls, VPN
OS / Security	Linux — RHEL, Ubuntu (production) Windows Server AWS IAM Security Groups Bastion Host

CERTIFICATIONS

AWS Solutions Architect – Associate (Credential ID: 83dabaf0548f404da8dc8dc8ddbaccacf)	May 2025
AWS Certified Cloud Practitioner (Credential ID: 44783f7efc8d4cf38ab6d43ddffa8a74)	Nov 2024
Real-time Multi Cloud & DevOps Bootcamp (Udemy / Online Platform)	Completed
CCNA R&S — Connecting Networks (Cisco Networking Academy)	Dec 2019
CCNA R&S — Scaling Networks (Cisco Networking Academy)	Dec 2019
CCNA R&S — Introduction to Networks (Cisco Networking Academy)	Sep 2019
CCNA R&S — Routing & Switching Essentials (Cisco Networking Academy)	Sep 2019

EDUCATION

B.Tech – Electronics & Communication Engineering (Lateral Entry) <i>G Pulla Reddy Engineering College — Kurnool, India</i>	2020 – 2023
Diploma – Electronics & Communication Engineering <i>Brindavan Institute of Technology and Science — Kurnool, India</i>	2017 – 2020
Completed CCNA R&S curriculum (4 modules, Cisco Networking Academy) during this period.
